#### Additional information:

- Total cost of the program will be announced prior to consignment, payable at the end of the program before picking up the heifers. There will be no additional costs for general health treatments or the management practices listed above.
- The heifers do not need to be weaned prior to delivery.
- All heifers must have received at least one round of vaccination for both clostridial (7- or 8-way) and respiratory diseases two to four weeks prior to delivery.
- A panel of AI sires of different breeds will be available to choose from. Any AI sire can be used provided it meets TAEP heifer bull requirements for that year and the semen can be purchased from a CSS certified bull stud.
